

Antigravity Docs to PDF

One-click export of Antigravity AI agent artifacts to high-fidelity PDFs.

Converts `walkthrough.md`, `implementation_plan.md`, and `task.md` files into beautiful PDFs with:

- ✔ **Mermaid diagrams** rendered as crisp SVG vectors
- ✔ **GitHub-style alerts** (`[!NOTE]`, `[!TIP]`, `[!WARNING]`, etc.) with icons and colors
- ✔ **Code blocks** with syntax highlighting
- ✔ **Task checkboxes** — `[x]`, `[/]`, `[]` rendered visually
- ✔ **Tables** with zebra striping
- ✔ **Lightweight** — uses your existing Chrome/Edge installation

Requirements

- Google Chrome or Microsoft Edge installed on your system
- VS Code 1.85+

Commands

Command	Description
<code>Antigravity: Export All</code>	Finds and exports all artifacts from the brain directory
<code>Antigravity: Export Current File</code>	Exports the currently open markdown file

Settings

Setting	Default	Description
<code>antigravity.brainPath</code>	<code>~/ .gemini/antigravity/brain</code>	Path to the Antigravity brain directory
<code>antigravity.exportPath</code>	<code>docs</code>	Export folder (relative to workspace root)

Installation

- Build the extension:

```
npm install
npm run build
npm run package
```

2. Install the `.vsix` file: **Extensions** → → **Install from VSIX...**

Development

```
npm install
npm run watch # Auto-rebuild on changes
```

Press `F5` in VS Code to launch the Extension Development Host.
