

# Antigravity Docs to PDF — VS Code Extension

---

## Tasks

---

-  Plan extension architecture and create implementation plan
-  Scaffold VS Code extension project ( `package.json` , `tsconfig.json` , etc.)
-  Implement `src/extension.ts` — command registration and activation
-  Implement `src/browserFinder.ts` — Chrome/Edge detection
-  Implement `src/markdownRenderer.ts` — markdown-it pipeline with alerts & mermaid
-  Implement `src/PdfGenerator.ts` — Puppeteer lifecycle, HTML gen, wait-for-render
-  Create `src/styles.css` — premium GitHub-light PDF stylesheet
-  Create `src/template.html` — HTML shell for PDF rendering
-  Install dependencies and verify TypeScript compilation
-  Verification — esbuild bundle + VSIX packaging
